Project - **IR Lounge with ELT**
Country - **France**
Company - **Alpha Wellness Sensations**

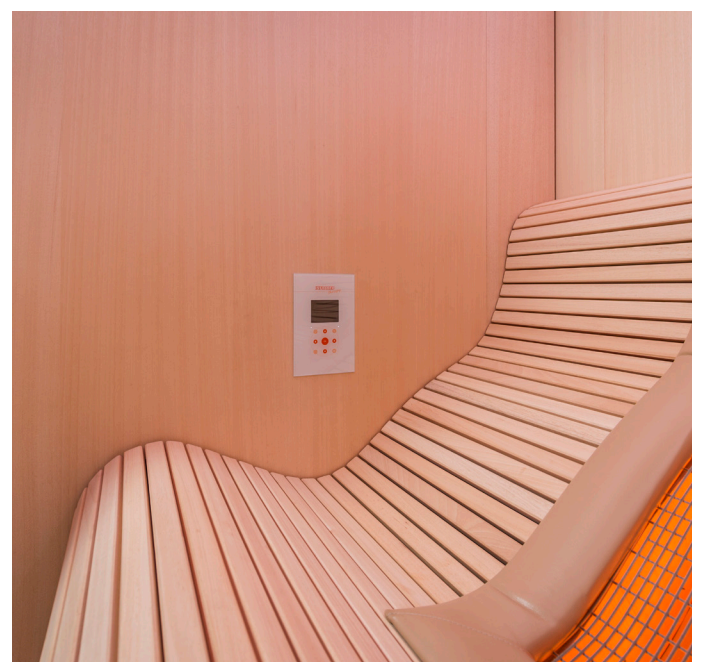

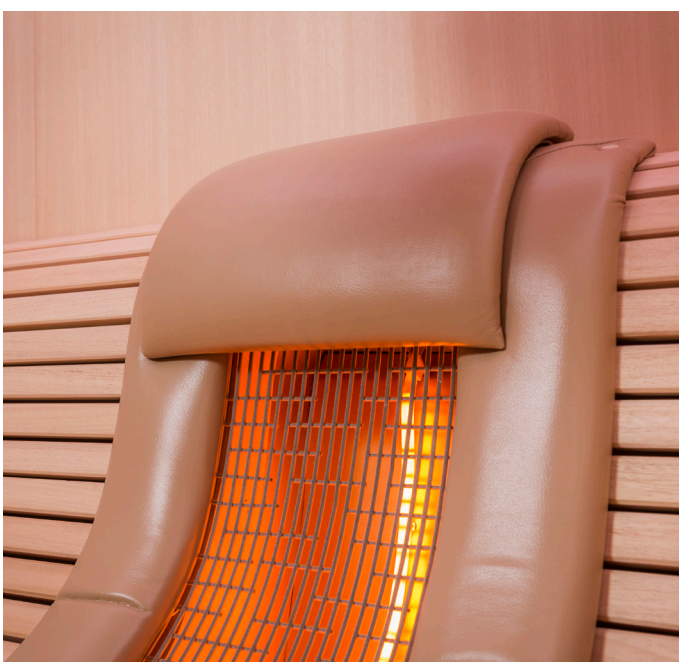

All our lounge models can be customized to fit any room, meet the highest design, and style expectations

When conceiving our Chaleur Lounge infrared sauna the task was to bring the absolute wellness feeling and relax comfort in to a limited space. Most infrared saunas have a straight sitting posture. On the drawing board is experimented to generate the maximum comfort experience.

Moreover, the main question was - how to implement in a lounge chair a full-spectrum infrared heater following and supporting the anatomy of the human body?

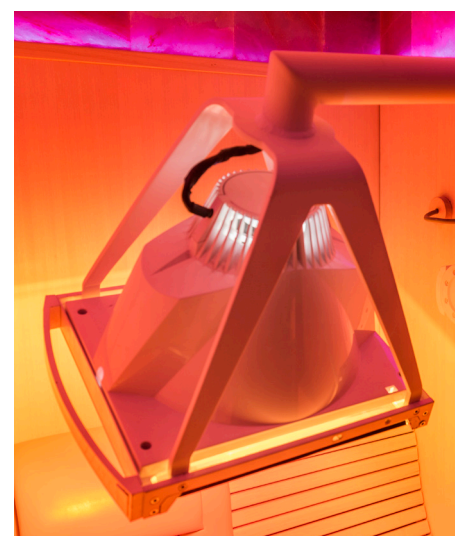

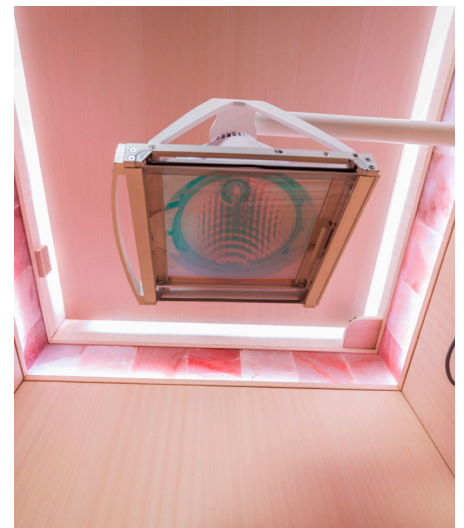

This research has resulted into a registered patent. The full-spectrum infrared heater in S - shape that seamlessly follows the body's posture was born. Lean back, relax and the penetrating warmth of the full-spectrum infrared S curve heater goes exactly where you want it.

Benefits of Ergonomic Heater & Chaleur Lounge Infrared Sauna

- RED DOT product design winner
- Patented design
- Unequaled ergonomic design and practicality
- Full coverage from cervix to coccyx due to 100cm long heater
- Full-spectrum dimmable heater
- No back pressure thank to the pads
- Controlled by AASC as no other controller
- Best infrared sauna on the market both functionally and aesthetically

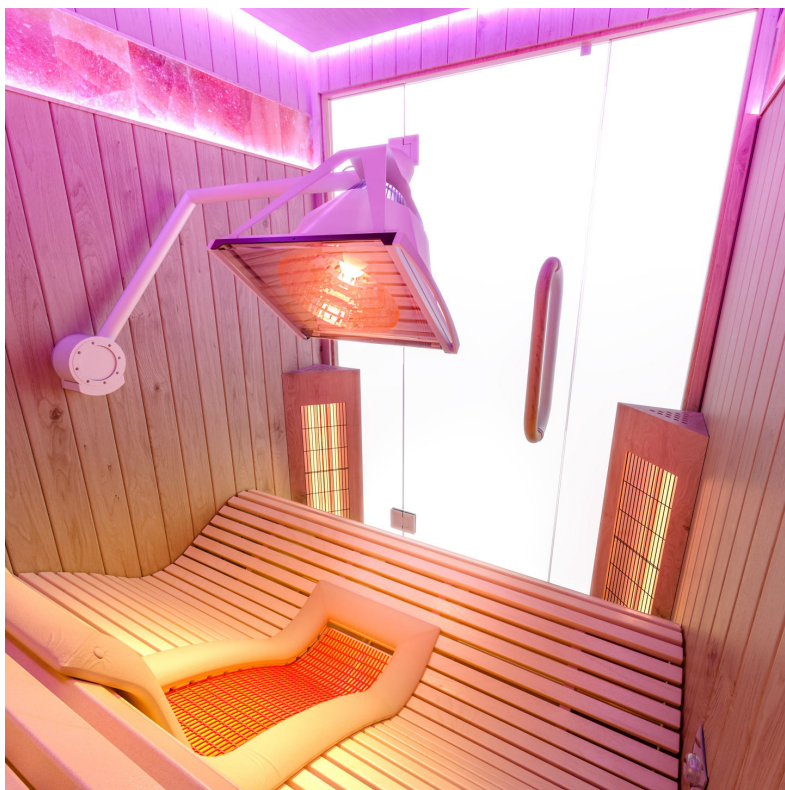

The mental and physical benefits of the infrared therapy are known worldwide. After achieving a huge success with our infamous Chaleur Lounge, we have set ourselves the goal to add value to the cabin and incorporate a beauty treatment with Energizing Light Technology (ELT), combine these two therapies and create a world premiere Chaleur Lounge ELT! Light from various active spectrums penetrates deep into the skin and stimulates the body's own production of collagen. The gentle and pleasant light stimulates the collagen production of the face, neck and upper part of the torso. All this while having a relaxing infrared session to unwind and detox.
