

where technology meets humanity

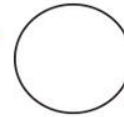

80%

of people will experience back pain in their lives

60%

of people will experience stress in their lives

technology

to solve massive problems

As more people seek effective ways to manage stress and physical discomfort, robotic massage is becoming an essential tool for health and well-being.

Whether used as a standalone solution or in conjunction with traditional massage therapy, iYU's regular robotic massage is transforming our experience of massage therapy.

capsix.

advantages of robotic massage ?

Simple.

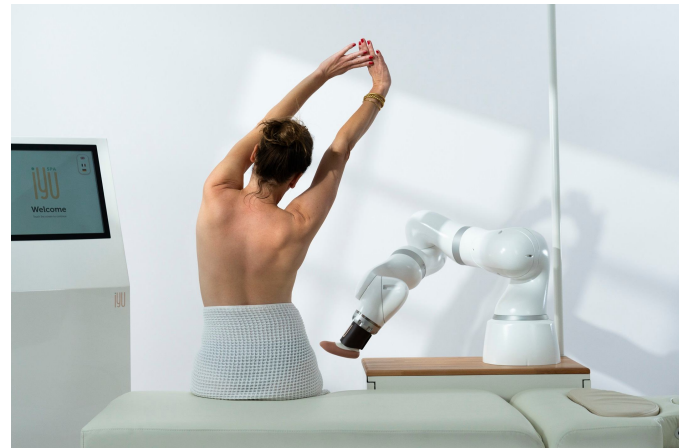

It provides consistent, high quality treatments on a regular basis 24/7.

Designed by expert massage therapists, iYU™ replicates their movements, targeting specific muscles with precise accuracy and pressure.

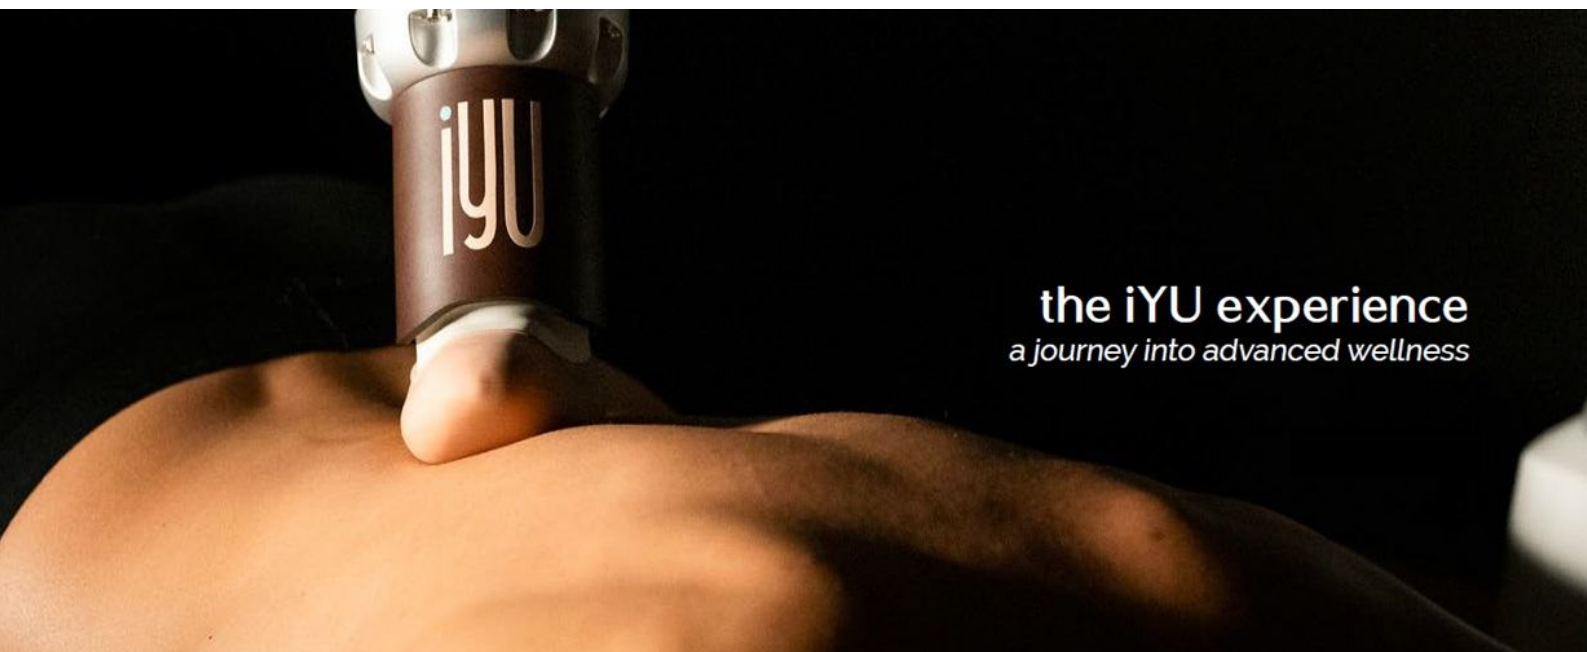

At Capsix, we believe robotic massage should go beyond body manipulation by conveying genuine intention. With iYU™, robotic massage transcends technology to reflect human expertise and emotion, inviting you to connect with yourself on the three levels: body, mind and soul.

taking care of humanity with next-gen health and wellness solutions

iYU™ is at the forefront of wellness innovation, providing on-demand relief for stress and muscle pain with expert-level care, available 24/7. This innovative approach not only enhances quality of life, but also responds to the economic needs of wellness and health centers, and to the economic impact of back pain and stress at a societal level.

iYU™, an experience worth feeling

the iYU experience
a journey into advanced wellness
